

TYPICAL REFERENCES

- **Engines Run Better.** I have put this conditioner in my fuel since diesel was reformulated to take out sulphur. My engines seem to run better, using less fuel and definitely less smoke. *By Jim.*
- **Performance Increased.** My experience with two boats and various trials is that transom soot, odour and smoke are all substantially reduced when using this additive. Also performance is increased, as a performance-enhancing diesel additive for use at every fill-up, this just can't be beat. I'm very pleased. *By Bob.*
- **Stood Up to Claims.** This product has totally stood up to what it claims to do. I'm already noticing a massive reduction in fuel consumption, diesel odours and transom soot. Well worth the money considering that a 1 litre bottle treats up to 1,500 litres. *By Scott.*
- **Excellent.** I have been using it on my narrowboat, my problem is that I don't use the engine very much, so I always have issues starting it with lots of black smoke. I can't believe the difference this product makes, engine starts immediately even when it hasn't been used for months with little or none black smoke. *By Jake.*

Supplied By:

Diesel Power Blast

**Reduces Fuel Consumption
By Up to 10%**

**Gives Smoother
More Responsive Engine**

I have an old Yanmar marine diesel engine and my mechanic highly recommended this product to keep the tank and injectors clean and to help the fuel maintain its cetane levels.

My mechanic swore that this product would help the combustion process and help cut down on any diesel smoke that the engine produces.

I have to say that after a year of adding this product to my fuel, it performs as he stated.

No diesel smoke, clean fuel, clean filters and the engine cranks up quicker and runs smoother.

This will be a regular item I'll have on board from now on.

*Runs Smoother. My Yanmar 1GM10 seems to run more smoothly and now get almost no carbon deposits on transom from exhaust my range has been extended by about 8%.

Hydra Diesel Power Blast Works For You

CLEANS AND PROTECTS INJECTORS & ENGINE COMBUSTION COMPONENTS

- Improves fuel economy by up to 10%.
- Gives smoother more responsive engine.
- Boosts fuel cetane by up to 5 numbers.

BENEFITS

- REDUCES FUEL CONSUMPTION
- REDUCES SOOT IN DPF SYSTEMS
- REDUCES DIESEL SMOKE & ODOUR
- CLEANS INJECTORS, PUMPS ETC
- REDUCES ALL HARMFUL EMISSIONS
- EVEN EURO 6 ENGINES BENEFIT

Deposits start building up in fuel injectors after only 2,000 miles from new, these interfere with the correct spray pattern, resulting in fuel wastage and higher emissions due to unburnt fuel leaving the engine. Diesel fuels with Cetane numbers lower than minimum engine requirements can cause rough engine operation. They are more difficult to start, especially in cold weather.

Your cost effective diesel fuel treatment

POWERFUL DETERGENTS

The powerful detergents in **Hydra Diesel Power Blast** prevents the formation of and removes existing deposits caused by carbon, fuel decomposition and unburnt fuel. These deposits interfere with the performance of your engine. Although your exhaust is not smoking these deposits are already effecting your boats efficiency and fuel economy.

OPTIMAL SPRAY PATTERN

100% clean injectors give optimal fuel spray pattern, this results in a very finely atomised spray. Each finely dispersed particle of fuel is surrounded by many molecules of air (20% oxygen) ensuring a more complete burn. Giving you much better fuel economy, as all of the fuel is burnt, reducing emissions and improving engine durability.

DIESEL PARTICLE FILTER

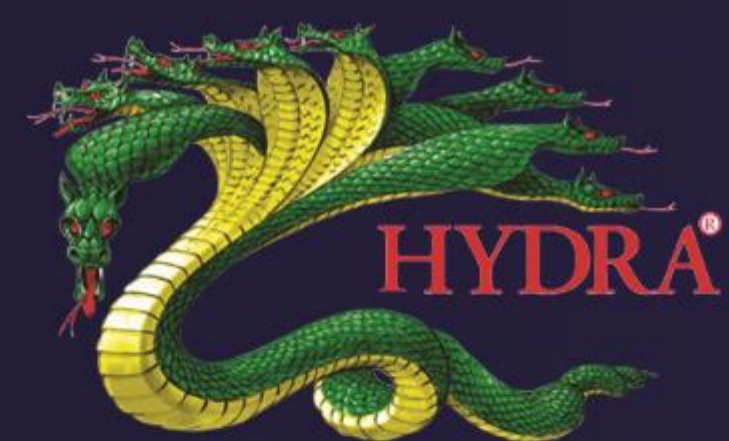

By reducing soot formation **Hydra Diesel Power Blast** also helps keep the diesel particle filters and exhaust gas return valves clean.

VERY ECONOMICAL

1 litre **Hydra Diesel Power Blast** treats up to 1500 litres of diesel fuel, simply add to fuel when filling up (can be added before or after refueling). Breakeven point on fuel savings against cost of product is approximately 1%. When your fuel consumption is reduced by more than 1% the product is not an additional cost, but is saving £££'s every week.

INTERNATIONAL STANDARDS

All our products are manufactured to the highest international specifications at our UK plant. Which is accredited to **ISO 9001:2008, ISO 14001:2004 and OHSAS 18001:2007** this ensures that the European **EN 590:2009** fuel quality standard is always adhered to.

SUITABLE FOR ALL DIESEL ENGINES

Including Cruisers, Luxury Yachts, River Boats, Narrow Boats, Fishing Boats, Lifeboats, Generators etc.
